

SRINATH REDDY MUCHA

Hanamkonda, India | +91 9652672003 | srinathreddymucha@gmail.com | www.linkedin.com/in/srinath-reddy-96976b289

CAREER OBJECTIVE

To leverage my problem-solving abilities and passion for web development in a collaborative and fast-paced environment. Eager to design and implement user-centric, responsive web applications that drive business growth and enhance digital experiences through innovative coding and continuous learning.

TECHNICAL SKILLS

- C
- Java
- Python(basic)
- HTML
- CSS
- JS
- Bootstrap
- Express
- Node and ReactJS
- GIT

EDUCATION

B. Tech – Computer science and Engineering	2021 – 2025
<i>JNTUH University College of Engineering Jagtial</i>	<i>CGPA: 6.67/10</i>
Intermediate – MPC	2019 – 2021
<i>SR AVR Campus, Batupalli, Hanamkonda</i>	<i>Score: 900/1000</i>
10 th Standard	2018 – 2019
<i>St Peters EDU School CBSE Senior secondary school</i>	<i>Marks:360/500</i>

INTERSHIPS

Data Science with Python Vreendaar IT Solutions	11/2023 - 02/2024
• Completed a data science internship at Vreendaar IT Solutions, focusing on Python for data analysis and machine learning. Worked on real-world projects involving data collection, cleaning, and extracting insights from large datasets. Applied academic knowledge to develop data-driven solutions that supported strategic decision-making and enhanced technical skills.	

PROJECTS

Malaria cell detection using transfer learning(CNN, DEEPLARNING, VGG19)
• In this project, I utilized transfer learning to detect malaria-infected cells from microscopic images. By using a pre-trained CNN model and fine-tuning it on a labeled dataset, I improved diagnostic accuracy and reduced training time. The model effectively differentiated between infected and healthy cells, achieving high performance in metrics like accuracy and recall. This approach supports faster and more reliable malaria diagnosis, showcasing the potential of AI in enhancing medical image analysis.
Social Learning Community
• In this project, I developed a collaborative platform that promotes peer-to-peer learning through forums, group activities, and resource sharing. The aim was to enhance learning outcomes by encouraging interaction, mentorship, and knowledge exchange among users. Key features included discussion boards, collaborative projects, and a structured feedback system. This platform fostered a sense of community, improved engagement, and demonstrated the impact of social learning in digital education environments.

CERTIFICATIONS

- Certified by HACKERRANK for successfully clearing the assessment for the skill “SQL (Intermediate)”.
- SQL and RELATIONAL DATABASES 101 by Cognitiveclass.ai
- Certified by HACKERRANK for successfully clearing the assessment for the skill “Frontend Developer (React)”.
- OneRoadmap Certificate Of Achievement FRONTEND DEVELOPMENT
- Introduction to Machine Learning from Kaggle
